

THE FRAMEWORK WORKED ITS MAGIC!!!

The new European Roma Framework has been 100% implemented. Change is at the door!

It has been a long way, but after many tries the Roma framework has been implemented and achieved the intended change. A big milestone was the increase of Roma political representation for at least 25% among international stakeholders and on the national level. It seems that the new tools, mechanism for data collection and impact measure developed by young Roma academics and scholars have proven quite effective. It seems that indeed everyone can learn from everyone! But, it only took Europe 100 years from the First Romani Congress to understand this! As commissioner for equality Torotcoi said: Everything changes when you stop assigning poverty an ethnicity and work together to eradicate it!
